ABOUT KINETIX:

Kinetix was founded in 2017 to help CSPs deliver better and faster business results. We are a team of computer scientists, strategists, infrastructure and network engineers as well as project managers united by a common passion for doing great work. With over 20 years of experience in Telco Industry we are uniquely positioned to become your trusted partner capable to deliver custom scalable solutions.

ABOUT PYXIS ECOSYSTEM:

We are a technology company founded in 2009. Synergy is the word that defines us best. We believe that it is easier to generate growth by focusing on partnerships and collaboration rather than competition. Over the last 10 years we grew our practice to over 300 people, 10 tech companies working under the same umbrella and over 800 projects implemented for mid to large-scale companies and diverse industries around the globe.
